1.4. Q88 PROJECTS (URBAN PLANNER WORK EXPERIENCE IN ASTANA, KAZAKSTAN 2022)

PAVLODAR'S CONCEPT PLAN

The project's aim was to provide local authorities with a programme for city development for the next 3 years. As part of the project, there was a focus on improving public spaces, redeveloping the embankment, and enhancing the central streets.

My role was to do the site analysis, to work with the community and to develop the final report. This report has 136 pages. This project was developed in Russian language.

ATYRAU'S CONCEPT PLAN

The project's aim was to provide local authorities with a programme for city development for the next 5 years. Atyrau is an important city in Kazakhstan, where the main oil refinery is located. In spite of this, there are many challenges for the city's public spaces, a lack of green infrastructure, and a poorly maintained river.

My role was to do the desk research and develop the final report.
This report has 45 pages. This project was developed in Russian language.
