2.3. SOUTH POPLAR (URBAN DESIGN: LAYOUT, DENSITY AND TYPOLOGY MODULE, UCL, LONDON, UK 2022)

GRAPHICS DEVELOPMENT

The project's aim was to develop a Master Plan for the South Poplar area, providing full site analysis and design solutions. This was for the development of 1000 housing units with 50% affordable housing.

MOVEMENT ANALYSIS AND DESIGN IDEAS

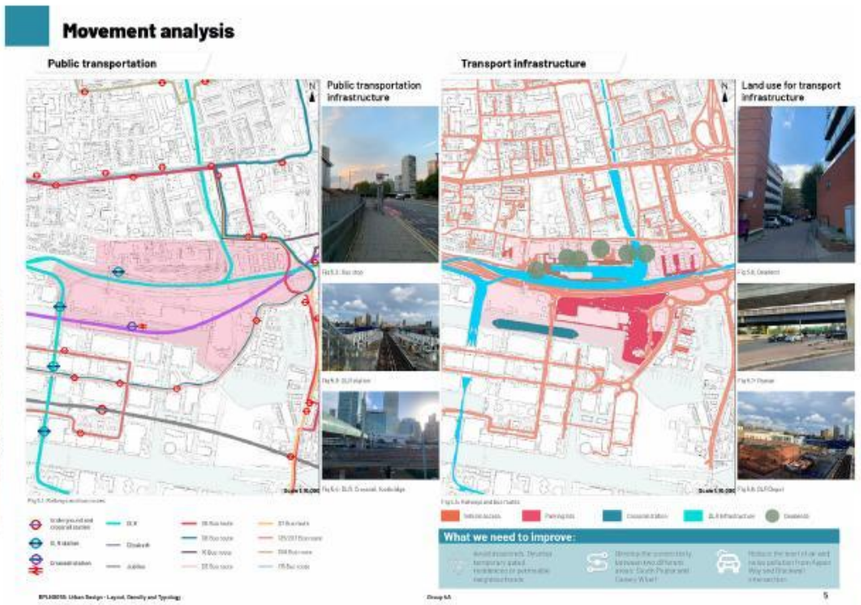

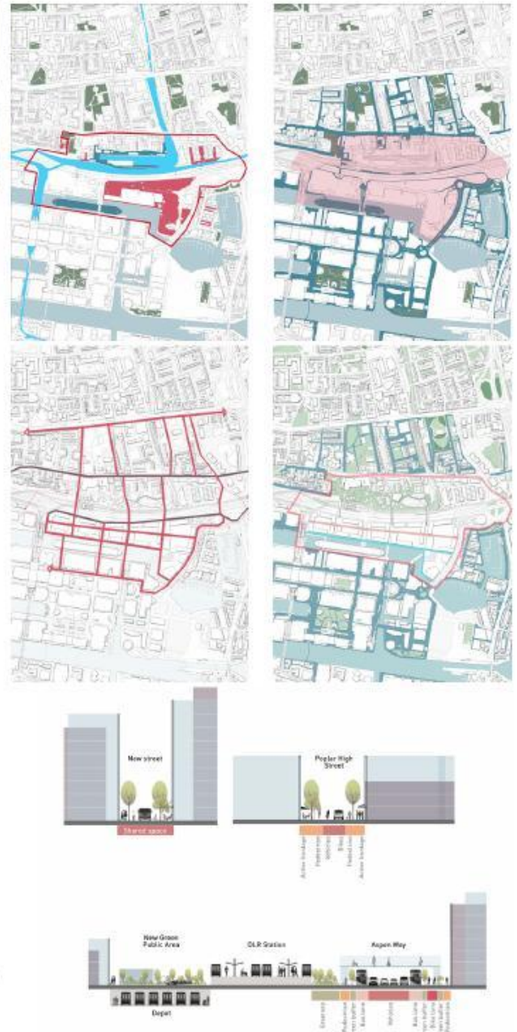

Figure 2.7: Movement analysis slide screenshot

Figure 2.8: New movement strategy slide screenshot

The project's vision was to build and enhance an environment designed with both the younger and future generations in mind and to create a residential led environment with safe, comfortable and accessible homes and communal hubs servicing the diverse populous within Poplar.

Figure 2.9: Diagrams developed for the report

My role was to develop the transportation analysis, the street design concept and the graphics. As a group we developed the vision and the report altogether. This report has 32 pages.
