2.4. USH TUT POCKET PARK (URBAN PLANNER AND DESIGNER POSITION, TURKISTAN, KAZAKHSTAN 2020)

The project's aim was to produce a concept ready to deliver. This project was developed **via co-design with local neighbours**. The project was not developed because it was not viable as local authorities said. There was no one to sponsor this transformation.

I was responsible for developing place-making ideas alone. However, several people were involved in this project to help me organise co-design events and to develop some drawings in AutoCad. **There are five chapters in the report, including a site analysis, design concept, visualisation, and detail design.**

This area was home to **three mulberry trees**. Thus, the mulberry tree was the basis for the pocket park's naming, branding, and overall identity details. Ush Tut means Three Mulberry trees from Kazakh.

Figure 2.14: Slide 16 depicts the initial Master plan sketches

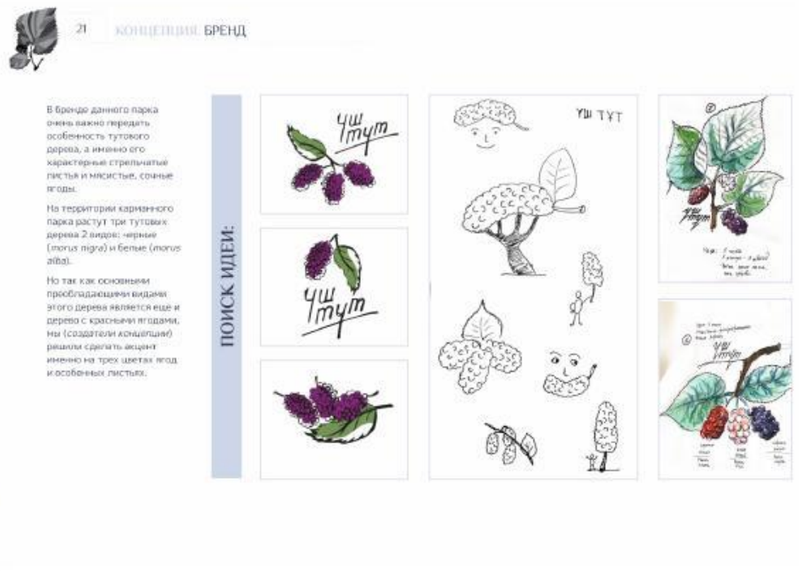

Figure 2.15: Slide 21 depicts the identity ideas search based on mulberry tree

Figure 2.16: Slide 28 depicts the Master plan drawing with the furniture locations

Figure 2.17: Slide 34 depicts Photoshop render for one of the views

Figure 2.18: Slide 37 depicts a play structure with a traditional Central Asian canopy called 'tapchan'

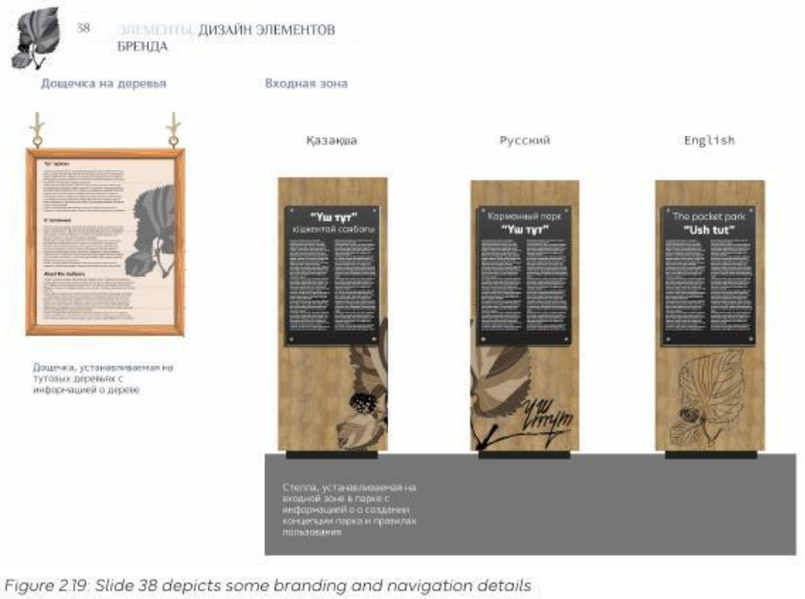

Figure 2.19: Slide 38 depicts some branding and navigation details

My role was to develop the whole project individually. I had an architect to help me to do some drawings in AutoCad. This report has 40 pages. This project was developed in Russian language.
